PROFESSIONAL SUMMARY

Enterprise Software Developer and Solutions Architect specializing in full-stack web applications, low-code to high-code enterprise modernization, and resilient offline-first systems. Discovered programming at Accenture in 2022 (2-Time Innovation Competition Winner with Power Apps & Automate), progressing into full-stack engineering across React 19, TypeScript, Node.js, and Cloud Firestore. Architected the modernization of 365+ legacy enterprise Lotus Domino applications to Microsoft 365/Power Platform across 28 business units, eliminating $960,000/year in licensing overhead. Built custom Python AST validation linters in CI for 7,878 YAML screens, developed zero-downtime offline-first synchronization engines, and engineered Tri-Engine AI task routers with sub-second latencies. Passionate about eliminating technical debt and engineering rock-solid software systems.

CORE COMPETENCIES & TECHNICAL SKILLS

React 19, Next.js & TypeScript 5.8	Microsoft Power Platform (YAML v3, PCF)
Cloud Firestore & Firebase Architecture	Power Automate & Microsoft Dataverse
Python 3.11+ (AST Linters, Playwright)	SharePoint Online & Graph API OAuth2
Tailwind CSS v4 & OKLCH Design Tokens	Tri-Engine AI Routing (Groq & Gemini)
RESTful APIs, OData & ERP Integration	T-SQL / PL-SQL / Relational Schemas
Offline-First PWA Synchronization	GAMP 5 Category 4 & 21 CFR Part 11
Azure DevOps CI/CD & Git Versioning	Full Lifecycle Software Architecture

WORK EXPERIENCE

Feb 2025 — Present | **Enterprise Solutions Architect & Pre-Sales Lead, Self-Employed / Independent Contractor** | **Remote**

- Closed RM 70,000+ in signed SOWs by converting discovery sessions into delivery contracts using rapid React/TypeScript prototypes and Dataverse architectures.
- Led a 3-person technical pod; managed sprint milestones, billable capacity, and QA to deliver client solutions on schedule with no scope overruns.
- Scoped and secured executive sign-off for modernization of 365+ legacy applications across 28 business units to Microsoft 365/SharePoint/Dataverse, defining a phased commercial roadmap.
- Expanded account value by 35% through workflow optimization and cross-selling integrations and ongoing automation support while sustaining 30–35% project margins.
- Accelerated sales velocity by delivering working POCs within 72 hours, shortening enterprise sales cycles by ~2 weeks.

May 2023 — Apr 2025 | **Systems Automation & Technical Lead, Concentrix CVG** | **Kuala Lumpur, Malaysia**

- Architected PulseTrack & SmartFlow (Power Apps, Power Automate, Dataverse) to automate reporting and SLA escalations, eliminating ~90% of manual reporting friction, cutting admin workload by 60–80%, and saving 120+ leadership hours weekly.
- Engineered CS Resolver (NLP routing using AI Builder), reducing routing errors by ~50%, cutting ticket misclassification by 40–60%, and accelerating issue resolution by 30–50%.
- Built real-time operational telemetry dashboards and automated shift adherence pipelines sustaining 98%+ contractual SLA compliance across 34-agent squads.
- Authored reusable Power Apps Component Framework (PCF) controls and automated data cleansing pipelines across SharePoint and Dataverse backend repositories.
- Conducted technical coaching and structured code reviews for citizen developers, enforcing solution architecture and ALM packaging standards.

Jul 2017 — Nov 2022 | Enterprise Workflow Specialist & Data Analyst, Accenture | Kuala Lumpur, Malaysia

- Discovered software development in 2022; selected to Accenture Innovation Team and won 2 consecutive internal innovation hackathons/competitions building custom Power Apps and automated Power Automate workflows.
- Progressed through four technical and operational roles from Data Analyst to Senior Lead, developing high-impact analytics dashboards and automated reporting workflows for global operations across 7 markets.
- Engineered Power BI shift telemetry and ticket distribution models, cutting SLA escalation turnaround from 4 hours to under 45 minutes and lifting throughput by 15%.
- Chaired Weekly Business Reviews (WBRs) using Six Sigma DMAIC root-cause analysis to remediate performance issues and exceed contractual KPIs.

LANGUAGES

Bahasa Indonesia (Native) Bahasa Melayu (Fluent) English (Professional Working)

KEY ARCHITECTURAL & SOFTWARE PROJECTS

IOI Corporation SHE Enterprise Modernization | Lead Solutions Architect

Power Apps Canvas YAML v3, Power Automate, Dataverse, SharePoint Online, Python AST

- Modernized 365+ legacy Lotus Domino DBs across 28 business units to Microsoft 365/Power Platform, saving $960,000/yr in licensing fees with zero factory downtime.
- Built custom Python AST linter validating 7,878 YAML screen definitions in CI, ensuring 100% syntax compliance and zero production regressions.

Tasek Cement E-Rebate & E-Procurement Systems | Enterprise Developer

Power Platform, Oracle 19c ERP, OData APIs, Multi-Tier Power Automate Approval Flows

- Engineered automated 7-tier financial rebate calculation engine with statutory RM 0.20/tonne caps, eliminating manual audit discrepancies.
- Automated procurement approval state machine, cutting cycle times from 3 days to under 15 minutes.

Putri GarmentHub ERP & Jastip OMS | Full-Stack Software Engineer

React 19, TypeScript, Tailwind CSS v4, Cloud Firestore, Offline-First Synchronization PWA

- Engineered 0ms synchronous local hydration engine, eliminating 6,070ms mobile TBT over industrial Wi-Fi with atomic 4-pocket financial ledger isolation.

EDUCATION

2013 — 2017 | Bachelor of International Business Management (Honours), Universiti Utara Malaysia | Sintok, Kedah, Malaysia

- Full Merit International Scholarship Recipient · 3-Time Dean's Academic List Award · Special Leadership Award
