PROFESSIONAL SUMMARY

Power Apps Developer with 9+ years of experience in operations automation and enterprise Power Platform delivery. Skilled in Power Apps Canvas Apps, Power Fx, and Dataverse solution delivery, as well as Power Automate cloud automation and Power Platform ALM. Successfully migrated 365+ legacy applications across 28+ business units and delivered 23 production Canvas and Model-Driven Power Apps, featuring 878 Canvas screens and over 400 custom React/TypeScript components.

SKILLS

- Power Apps Canvas Apps
- Power Fx
- Dataverse
- Power Automate
- Data Modeling
- Security Roles
- Cloud Flows
- Power Platform ALM
- Solutions
- SQL
- Relational Data Modeling
- REST API
- Low-Code Platform Migration
- Power BI
- PCF/TypeScript
- Azure
- Working In Sprints
- Tight Deadlines

WORK EXPERIENCE

Jul 2025 — Present

Enterprise Power Platform Solution Architect, Independent / Freelance

Remote

- Engineered the migration of over 365 Lotus Domino and legacy business applications across 28 business units to Microsoft 365 and Dataverse, establishing a comprehensive migration strategy and governance framework.
- Architected hybrid applications utilizing Power Apps Canvas Apps, React 19, and TypeScript, enhancing application performance and user experience through effective Power Platform ALM practices.
- Developed security roles and data architecture for applications, ensuring compliance with financial audit standards while implementing multi-tier role-based security in the Isolated Rebate Approval System.
- Delivered full-stack AI chatbot applications that integrated with MySQL/PostgreSQL and utilized REST APIs, significantly accelerating enterprise automation delivery.
- Optimized project timelines by up to 70% through the implementation of efficient workflows and automation strategies, including the use of Azure Pipelines and GitHub Actions.

May 2023 — Apr 2025

Operations Team Leader & Process Automation Lead, Concentrix CVG

Kuala Lumpur, Malaysia

- Developed PulseTrack and SmartFlow analytics tools using Power Apps Canvas Apps and Power BI, achieving a 90% reduction in manual reporting and decreasing leadership administrative workload by 60-80%.
- Implemented automated reporting frameworks in Power BI and QlikView, enhancing operational efficiency by 25% and standardizing KPI visibility across teams.
- Engineered real-time data tracking pipelines with over 90% data accuracy, resulting in a 25% reduction in average handling time.

Jul 2017 — Nov 2022

Senior Team Lead / Operations Team Lead, Accenture

Kuala Lumpur, Malaysia

- Managed technical delivery and operations for cross-functional teams of up to 34 members across 7 global markets, achieving over 98% SLA compliance.
- Developed SQL-backed reporting dashboards using Tableau and QlikView to enhance decision accuracy and monitor critical error rates for global Trust & Safety operations.

PROJECTS

IOI Group Enterprise Legacy Modernization (Freelance)

- **Role:** Lead Solution Architect and implementation lead for the enterprise modernization effort.
- **Scope:** Architected the migration of 365+ legacy applications across 28+ business units to Microsoft 365, SharePoint Online, OneDrive for Business, Microsoft Teams, and Dataverse.
- **Delivery:** Designed a dual-track solution delivering 23 production Canvas and Model-Driven Power Apps, 878 Canvas screens, and 400+ custom React/TypeScript components.
- **AI impact:** Built an automated development pipeline using 50+ specialized AI agents across 12 workflow stages, reducing delivery timelines by up to 70%.

Isolated Rebate Approval System (Freelance)

- Multi-tier financial approval workflow built on Dataverse with isolated databases, custom TypeScript components, and role-based approval routing to meet strict audit standards.

EDUCATION

Feb 2013 — Dec 2016

Bachelor of International Business Management (Honours), Universiti Utara Malaysia

- Field of Study: International Business Management
- Minor: Logistics & Transportation
- UUM International Scheme Scholarship Recipient
- 3x Dean's Academic Award
